Florida Department of Agriculture and Consumer Services

Commissioner Wilton Simpson

Fiscal Year 25-26 Fertilizer Commercial Values Survey

How to calculate:

Assume that a 46% nitrogen material 46-0-0 sells for $225.00 per ton retail, then:

Cost of Material	**$ 225.00**
46% = Cost per Unit	**46 = $4.89 Com. Value**

***A "Unit" of plant nutrient is 1% (by weight) of a ton or 20 pounds.**

(1) PRIMARY PLANT NUTRIENTS	Guaranteed as	Commercial Values (per unit*) PROPOSED
Total Nitrogen	N	$_________
Nitrate Nitrogen	N	$_________
Ammoniacal Nitrogen	N	$_________
Water Soluble Nitrogen or Urea Nitrogen	N	$_________
Slow Release Nitrogen (from other SRN sources)	N	$_________
Water Insoluble Nitrogen	N	$_________
Available Phosphorus	P_2O_5	$_________
Total Phosphorus	P_2O_5	$_________
Potassium (from Muriate)	K_2O	$_________

Potassium (from any source other than Muriate of a combination of sources)	K_2O	$_________

(2) SECONDARY PLANT NUTRIENTS

Total & Water Soluble Magnesium (from any source)	Mg	$_________
Manganese (from sulfate)	Mn	$_________
Manganese (from sucrate)	Mn	$_________
Manganese (from humate)	Mn	$_________
Manganese (chloride)	Mn	$_________
Manganese (from oxide)	Mn	$_________
Seaweed Extract (Natural Chelating Agent)		$_________
Manganese (from chelate in group 1**)	Mn	$_________
Manganese (from chelate in group 2**)	Mn	$_________
Copper (from sulfate)	Cu	$_________
Copper (from sucrate)	Cu	$_________
Copper (from humate)	Cu	$_________
Copper (from chloride)	Cu	$_________
Copper (from oxide)	Cu	$_________
Copper (from chelate in group 1**)	Cu	$_________
Copper (from chelate in group 2**)	Cu	$_________
Zinc (from sulfate)	Zn	$_________
Zinc (from sucrate)	Zn	$_________
Zinc (from humate)	Zn	$_________

Zinc (from chloride)	Zn	$_________
Zinc (from oxide)	Zn	$_________
Zinc (from chelate in group 1**)	Zn	$_________
Zinc (from chelate in group 2**)	Zn	$_________
Iron (from sulfate)	Fe	$_________
Iron (from sucrate)	Fe	$_________
Iron Humate	Fe	$_________
Iron (from oxide)	Fe	$_________
Iron (from chelate in group 1**)	Fe	$_________
Iron (from chelate in group 2**)	Fe	$_________

**** Chelates in "group 1" have aminopolycarboxylic acids, such as EDTA, HEDTA, DTPA, and NTA, or related compounds as chelating agents. Chelates in "group 2" have chelating agents other than those in group 1.**

Aluminum	Al	$_________
Sulfur (free- from Elemental Sulfur or SCU)	S	$_________
Sulfur (combined - from Sulfates)	S	$_________
Boron	B	$_________
Molybdenum	Mo	$_________
Cobalt	Co	$_________
Calcium (from any source)	Ca	$_________

(3) DOLOMITE AND LIMESTONE (When sold as material)

Magnesium	$MgCO_3$	__________
Calcium	$CaCO_3$	__________

(4) CALCIUM SULFATE (Land Plaster, Gypsum) (when sold as material)

Calcium	$CaSO_4$	____________

(5) SLOW OR CONTROLLED RELEASE MATERIALS (when sold as material)

Material	Cost Per Ton	Grade
Sulfur Coated Urea:	$__________	______________
Resin Coated Urea	$__________	______________
Sulfur Coated Ammonia	$__________	______________
Sulfur Coated Nitrate	$__________	______________
Methylene Urea	$__________	______________
Dimethylenetriureas	$__________	______________
Methylenediurea	$__________	______________
Urea Formaldehyde	$__________	______________
IBDU	$__________	______________
Plastic Coated Ammonia	$__________	______________
Plastic Coated Urea	$__________	______________
Nutralene	$__________	______________
Cyclodiurea	$__________	______________
Urea Triazone	$__________	______________
Manure	$__________	______________
Biosolids /Sewage Sludge	$__________	______________
Other	$__________	______________

Statute and Rule References:

F.S., 576.071. Commercial Value. The commercial value used in assessing penalties for any deficiency shall be determined by surveying the fertilizer industry in the state using annualized plant nutrient values contained in one or more generally recognized journals.

F.S., 576.061. Plant nutrient investigational allowances, deficiencies, and penalties. (2) (b) Penalties shall be assessed at the rate of three times the commercial value of the deficiency found, using the formula: the percent deficient times the commercial value times three times the tonnage represented by the official sample.

F.A.C., 5E-1.016. Commercial Values for Penalty Assessments. The commercial values used in assessing penalties for plant nutrient deficiencies are determined by the annualized average market prices published by the Green Markets Publication (effective 9/17/07), which is hereby incorporated by reference. Commercial Values not provided in Industry Publications will be established through survey approved by the Fertilizer Technical Council. Copies may be obtained from the Green Markets, 1010 Wayne Avenue, Suite 1400, Silver Spring, MD 20910 USA. This rule shall be reviewed annually.
